

TRIAD Early Intervention Virtual Learning Community:
Communication Series

October 5 - November 9, 2018
2:00pm-3:00pm
Online

Please join Vanderbilt's Treatment and Research Institute for Autism Spectrum Disorders' (TRIAD) Early Intervention Virtual Learning Community focused on addressing communication. The purpose of this learning community is to give early intervention providers information and strategies related to communicative skill acquisition for young children with ASD and related developmental delays and disabilities. The series will consist of six 1-hour interactive webinar sessions and will highlight application of the strategies and tools in TRIAD's Early Intervention Communication Curriculum Module. Each session will build upon the previous sessions. Therefore, registrants are encouraged to attend all sessions.
