

TENNESSEE CARES NETWORK

at Vanderbilt University Medical Center

Guiding families and providers to resources supporting child development

A family is referred to us by their child's care provider.

We contact the family to connect them to resources related to child development.

We share notes back with the child's care provider.

Our Family Navigators will work with families and caregivers as they seek services such as:

Diagnostic assessment for autism spectrum disorder or other developmental disabilities
Early intervention or school-based services • Family/caregiver trainings • Therapy services

While waiting for a navigator to call, please check out supports and resources on our website

Funded through the Health Resources & Services Administration (HRSA) and the Autism CARES Act #H6MMC332360100
