

Did You Struggle Feeding Your Child with Autism as an Infant?

We would be interested in hearing your story.

If you are a mother to a child ages 2-10 years old with an Autism diagnosis who had difficulty feeding at 0-12 months of age, you may be able to take part in this research study!

You May Qualify If You:

- Are 18 years of age or older
- English speaking
- Initiated breastfeeding with your child with Autism
- Have at least one other neurotypical child

Participation Involves:

- 30-45 minute interview over Zoom
- A follow-up email or telephone call if needed after the interview for any clarification needed
- You will be compensated for your time
