

Help Us Learn About Teen Development

Date of IRB Approval: 08/13/2024

Volunteer for Research at Vanderbilt

We invite children and adolescents ages 8-13 years with autism OR typical development to be part of our research about pubertal development and social stress.

Participation includes:

- Psychological testing and exam, 2-3 hours
- Social interaction and EEG, 2 hours
- Follow-up assessments 1 time a year for a total time commitment of 4 years

Participants will be compensated up to \$100 per year based on number of tasks completed and will receive a research letter with test results per completed visit.
