

Sibwatch

Your infant/toddler sibling of a child with autism may be eligible for our research study to monitor development!

You may be eligible if:

1

Your infant/toddler is younger than 24 months old

2

Your infant/toddler is a biological sibling of a child with an autism diagnosis

3

You speak English with your infant/toddler for most of the day

Participants will receive ongoing evaluation of your infant/toddler's development, an opportunity to receive intervention, a toy set, a book of strategies for supporting communication, and a developmental report of your child's progress. Participation in this study will total 9 months with a follow-up at 12 months. You will receive \$200 for participating.
