

AUTISM RESEARCH

NOW RECRUITING

Teens and adults with autism spectrum disorders, ages 14-50 years, with normal or corrected-to-normal hearing and vision for autism research designed to help us better understand the sensory differences of people with autism.

Participants are compensated for their time at a rate of \$20 / hour and typically attend between 1-4 appointments to complete between 4-10 hours of assessments (vocabulary, problem solving, language & computer games.) For more information please contact:
