

Help Us Learn More About Stuttering, Speech and Language in Children

A 3-year research study looking at how children's thoughts, emotions, and language may affect their stuttering.

Children may be able to join this research study if they:

- are 3-6 years old, and
- do or do not stutter

Having your child take part in this research study is up to you. If they join, they can leave the study at any time.

Potential benefits:

- Your child will have a stuttering and speech-language consultation
- Your child will have yearly follow-up assessments for 3 years
- You will get your child's speech-language assessment results
- You will get service referrals if needed

Compensation of \$100 total (\$50 per visit)
