

# MEASURING MATH RESEARCH STUDY

How can we best assess math ability  
in students K-12?

## Who is eligible?

- Children ages 5-18
- English speaking individuals
- Normal or corrected to normal vision
- Free of pre-existing neurological conditions

## What is involved?

- One roughly 60 to 90 minute visit for questionnaires and basic math and number tasks on paper and a computer

## What will we ask you to do?

- Age-appropriate math problems and number tasks

## Compensation

- You will receive \$20/hour in the form of a gift card
