Are you a speech-language pathologist who works with children who use aided augmentative and alternative communication (AAC)?

If so, we hope you will participate in a survey about your views of and experiences with telepractice!

Who can participate?

- Speech-language pathologists (SLP) in the US who work with at least one child (aged 3-21) who uses AAC
- Our interest is in telepractice, but SLPs do not necessarily need to be providing telepractice services to participate

What does participation involve?

- The survey is voluntary and should take you about 30 minutes to complete; all responses will be kept confidential.

What would I receive?

- All participants will receive resources developed out of the findings of the study
- You could receive one of ten $75 e-gift cards for completing the survey!
