

Research Opportunity for Girls and Women with Rett Syndrome

The Vanderbilt Kennedy Center Rett Syndrome Program is seeking girls and women of all ages with Rett syndrome to participate in a research study.

The purpose of this study is to assess a clinician-reported assessment method called the Revised-Motor Behavior Assessment (R-MBA)

Participants will schedule an appointment to receive an on-site clinical evaluation by a member of the Vanderbilt Rett Syndrome Program clinical team. The evaluation will be videotaped for clinician review and may be used to create future educational materials.

Parents will be interviewed and asked to complete questionnaires during the evaluation. You will be compensated for your time.
