TRC-DS is funded by the National Institutes of Health's INCLUDE (INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE) initiative, in partnership with:

ABC-DS

ACTC-DS
Alzheimer's Clinical Trials Consortium
Down Syndrome

NIH National Institutes of Health
Turning Discovery Into Health

TRC-DS is recruiting volunteers at 12 research centers across the United States and three in Europe:

USA

- Boston, MA*
- Boulder, CO
- Cleveland, OH
- Indianapolis, IN
- Lexington, KY*
- Madison, WI*
- Nashville, TN
- Orange, CA*
- Phoenix, AZ
- Pittsburgh, PA*
- Staten Island, NY*
- St. Louis, MO*

EUROPE

- Barcelona, ESP
- Cambridge, UK*
- London, UK

*Indicates co-enrolling center for ABC-DS and TRC-DS

Bringing the latest discoveries in the Alzheimer's field to people with Down syndrome

TRC DS
Trial-Ready Cohort-Down Syndrome

Down syndrome and Alzheimer's are linked

As many as eight in 10 people with Down syndrome develop Alzheimer's disease which is a leading cause of death for this population.

Researchers are committed to giving back to this community.

TRC-DS community

The Trial-Ready Cohort-Down Syndrome (TRC-DS) is a community of clinical trial volunteers who could help find a cure for Alzheimer's disease.

TRC-DS matches people with Down syndrome to clinical trials related to Alzheimer's disease.

Volunteers needed

TRC-DS needs healthy adults, ages 25-55, with Down syndrome to join.

Volunteers:

- Will visit their nearest research center once every 16 months for routine tests and brain scans;
- Are on the fast-track for Alzheimer's clinical trials; and
- Help advance research.

Privacy Statement

The privacy of TRC-DS participants is top priority. The study is required by law to maintain the privacy and security of participants' protected health information.
