

# PARTICIPANTS NEEDED FOR RESEARCH STUDY!

Help us learn about how individuals on the Autism Spectrum perform in job interview simulations and video interviews.

## Participants will:

- interact with an AI-based virtual interviewer in a job interview simulation.
- interact with a remote video interviewing platform called HireVue where their responses to questions will be analyzed by AI to provide interview feedback.

## Data to be collected from:

- eye tracking
- wristband sensor for heart rate, blood pressure, temperature, etc.
