

Now recruiting research participants

**Are you the parent of a toddler?
Are you interested
in completing a brief
questionnaire about your
child's development?**

Researchers at Vanderbilt University Medical Center are conducting research about telehealth assessment of autism spectrum disorder (ASD) in toddlers between 18 and 42 months of age. This is an *online* screening for participation in the research study.

VANDERBILT  UNIVERSITY
MEDICAL CENTER

Tele-assessment of Development Study

Who can participate?

Parents of children between the ages of 18 and 42 months

What does the study involve?

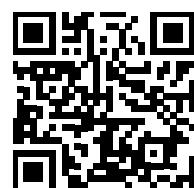

- Completion of an *online* developmental screening questionnaire
- If no concerns are raised, your participation in the study will be complete
- If possible developmental concerns are identified, you will be contacted and invited to participate in a larger research study about tele-assessment procedures for ASD

What else can I expect?

Compensation of \$25 for completing the screening
