

Planning for Social Engagement

1. How does your child currently socially interact with you? (during play or other daily routine)
2. What are some play activities or daily routines in which you could work on social engagement?
3. List actions, words, sounds you would like your child to learn to imitate.
4. Here is a list of potential goals: (maintain engagement during interactions, share positive exchanges, take a turn, initiate a response, respond to initiations, increase variety of interactions, generalize to other people and settings)

What social engagement goal will you target with your child at home? Choose ONE to start!

What are some choices that could be offered during the activity?	
What are some comments I could model during the activity?	
What are some gestures I could incorporate during the activity?	
What are some	

supports I could use to support or teach new interactions?
