

Conversation Boards for Caregivers- An Overview

Evidence-Based Practice Link	Conversation boards are a form of visual support , which is an evidence-based practice for autistic individuals. Visual supports are defined as a “visual display that supports the [person] in engaging in a desired behavior or skills independent of additional prompts.” (Steinbrenner et al, 29)
When to Use Conversation Boards	<p>Ideal instances to use conversation boards with autistic individuals, or other individuals with or without disabilities, could include (but are not limited to):</p> <ul style="list-style-type: none"> • Mealtime • Family time • Extracurricular activities • Unstructured play and leisure time • At a restaurant • In public places
Why Use Conversation Boards	<ul style="list-style-type: none"> • Promotes social interactions on a variety of topics. • Provides structure for familial interactions. • Fosters individual autonomy.
Critical Components of Conversation Boards	<ol style="list-style-type: none"> 1. Have an appropriate visual representation at the child’s current skill level to denote conversation topics and prompts. 2. Start by including conversation topics that child is familiar with. 3. Prompt the child to use the conversation board when presented with an opportunity to interact with others. 4. Set up opportunities to practice using the conversation board in various settings with a variety of people. 5. Provide reinforcement to the child for using the conversation board to engage in conversation.

Conversation Board in Action
