

Intervention Planning Guide

Complete the following form to describe an intervention to address student needs.

SMART Goal *Reference SMART goal setting guide	Team will teach XXX how to effectively use noncontingent attention (NCA) to support student with attention-maintained behaviors to increase their engagement in class.	
Baseline	Baseline context:	Session data from functional analysis
	Baseline data type and dates:	Partial interval data, Nov. 17-20, 2022
	Date intervention plan created:	Nov. 20, 2022
	Who implements plan:	Ms. Olivia
	What materials are needed:	Stopwatch
	How the intervention is delivered, including any reinforcement procedures:	NCA will be implemented for 1 hour from 1-2 p.m. each day. This time of day was indicated by baseline data when target behaviors were most likely to occur. The teacher will provide NCA (e.g., smile, thumbs up, any type of positive comment), every five minutes as prompted by stopwatch during intervals to promote student engagement in the class. Each session the teacher will lead a class discussion/whole group activity where she will prompt students to answer questions and engage with their peers.
	Date and context for initial implementation:	Date: Nov. 21, 2022, 1-2 p.m. Context: Whole group instruction
On-Going Intervention Data	Data collector:	TRIAD Staff & Ms. Olivia
	Intervention data type:	Partial Interval
	Mastery criteria:	5 consecutive sessions (i.e., 60 trials) where target behavior does not occur while teacher is providing NCA every 5 minutes.
	Adjustment criteria:	If more than 3 consecutive observations are below 75% integrity or student does not engage in target behavior with teacher providing NCA, increase the interval by 2 minutes (e.g., 5 min, 7 min, 9 min, 11 min, 13 min, 15 min) for teacher attention. Additional support will be provided to the team in the form of video reviews, roleplays, or in-person visits.
Plan Review	Implementation review	Future Observation date scheduled for: XXXX XXXX
	Plan fidelity (Rate 0-5: 0 = not at all; 3 = somewhat; 5 = completely)	*Insert plan fidelity*
	Quantity or dosage of implementation	1 hour, 5 days a week
	Plan execution (e.g., dates, performance data, decisions and changes): * Complete at first review meeting	*Describe next steps here*
